

What Partnerships UK is

Partnerships UK is a public private partnership: a joint venture with the public sector owning a minority interest and the private sector owning a majority.

The structure has been designed to balance private sector disciplines with Partnerships UK's public sector mission.

Partnerships UK will maintain very close links with Government. As the successor to the Treasury Taskforce, it will continue to assist the Treasury, Government Departments and the Office of Government Commerce.

What Partnerships UK does

Partnerships UK is not an adviser. It acts as a PPP developer, working in partnership with public bodies.

Partnerships UK has been set up to help the public sector deliver:

- fast and efficient development and procurement of PPPs;
- strong PPPs that build stable relationships with the private sector;
- savings in development costs; and
- better value for money.

It does this by standing shoulder to shoulder with public bodies throughout the development, procurement and negotiation of a PPP.
