Briefing

Cross-government

Companies in government
Our vision is to help the nation spend wisely.
Our public audit perspective helps Parliament hold government to account and improve public services.
The National Audit Office study team consisted of: Charlotta Blomberg and Imran Qureshi, under the direction of Matthew Rees.

This report can be found on the National Audit Office website at www.nao.org.uk

Summary

1 This briefing explains how 3,038 companies relate to each of the 17 central government departments; and shows how the number of companies has increased since 2010. It is based on five publicly available sources of information on companies in government as at 31 March 2014. It explains the basis for each source and how the results differ.

2 This factual briefing does not seek to evaluate any company, nor to reach any conclusions about value for money. The facts presented in this report may however raise issues relating to transparency, accountability, governance and review. It makes reference to the accountability and governance themes which have been examined in previous reports concerning the Cabinet Office’s Progress on public bodies reform; and The Shareholder Executive and Public Sector Businesses. It is also a companion for our recent report concerning the financial institutions landscape, which contains descriptions and financial information about a number of large companies and the implications for the government’s balance sheet.

Scope

3 This briefing is structured in five parts:

- **Part One** introduces some important definitions and concepts which are applied throughout the report.
- **Part Two** identifies five public sources about companies, compares the lists derived using each and explains why the contents differ. It also summarises the sixth source – a full departmental mapping – that we have created for the purpose of this briefing, and which is published in Part Five.
- **Part Three** describes the process of creating arm’s-length public bodies and the circumstances in which they may be incorporated as companies, Royal Charters or statutory corporations. It also describes the public bodies reform programme.

---

1 The analysis relates to the position during the 2013-14 financial year, consistent with the most recent WGA in order to achieve consistency with the sources of information used. Recent developments are summarised in Part 2.
2 Available at: www.nao.org.uk/report/progress-public-bodies-reform/
4 Financial institutions in government. We have also published an interactive data tool alongside the financial institutions landscape to explore the financial profile for the financial institutions landscape, many of which are companies in government. Available at: www.nao.org.uk/wp-content/uploads/2015/09/Financial-institutions-landscape.pdf
Part Four describes some of the key relationships between departments and companies; how principles of public accountability are combined with corporate governance arrangements; and compares the approach to assurance of companies in government and other public bodies. We did not examine the processes of individual departments when creating new companies.

Part Five contains a detailed mapping of companies to each of the 17 central government departments, reflecting the position at 31 March 2014.

We have included companies which central government wholly or partly owns or controls. We included the parent company and first-line subsidiaries where this information was readily available. The scope does not extend to local government, NHS, police and fire, higher and further education, local partnerships, limited liability partnerships (LLPs), community interest companies and public service mutuals. The financial sustainability of companies in government is also outside our scope.

Key findings

There is currently no single, definitive, source of information about the number of companies in government. To identify companies in government we used available public sources listing entities which make up the public sector landscape. None of these sources are designed specifically to identify companies owned or controlled by government. Consequently these sources lead to different totals, (paragraphs 2.3 to 2.19). The connection between the sources is set out in Figure 1 overleaf.

The public sources are:

- The Public Bodies Data Directory, which Cabinet Office prepares, identifies 28 companies. This directory is a compilation of public bodies operating at arm’s length from their sponsoring departments. Only if a company has been categorised as a type of public body does it appear in the directory, (paragraphs 2.5 to 2.6).

- The public sector classification index, which the Office for National Statistics (ONS) maintains, identifies 69 companies. The ONS classifies entities to the public sector using a test of control which is standardised across the European Union to achieve consistency in the way that governments calculate national debt, (paragraphs 2.7 to 2.9).

- The Whole of Government Accounts (WGA), which HM Treasury prepares, identifies 69 companies. The Treasury specifies which companies, alongside all other public bodies, should be included in this consolidated financial statement each year. It is based on a similar approach to the ONS, (paragraphs 2.10 to 2.12).

---

6 The administrative categories in the Public Bodies Directory include non-ministerial department (NMD), Executive Agency (EA), which includes Executive Agency Trading Fund (EATF), Executive, Advisory or Tribunal non-departmental public bodies (NDPB) and Public Corporation (PC) which is a statistical not administrative classification. These are sometimes referred to collectively as arm’s-length bodies (ALBs).
Summary

Companies in government

Figure 1
Summary of classification of 218 companies in government identified by the NAO

Area represents the total of 218 companies in government

Notes
1 Not to scale.
2 National Audit Office tally of companies in government: 218. Not included in central databases: 134 (including 9/11 special shares, 17 dormant rail companies and 21 Community Rehabilitation Companies).
3 PBD is the Public Bodies Directory maintained by Cabinet Office.
4 ONS is the public sector classification register maintained by the Office for National Statistics.
5 WGA is the Whole of Government Accounts.

Source: National Audit Office analysis
6 The aggregate total of companies identified in each of the three sources is 84 companies, of which 27 appear in all three sources. The partial overlap stems from application of the different methods, and concerns a number of key concepts including how to distinguish between function and form, ownership, control and independence (paragraphs 2.17 to 2.19, Figure 1).

7 In total we have identified 3,038 companies in government, including 2,591 Academy Trusts, 218 parent companies, and a further 229 subsidiaries of these parent companies. We amalgamated all three sources described above, and supplemented it with a review of departmental annual reports and accounts and the Companies House register. We adopted a broad principle for inclusion which recognises ownership and other indicators of control including the dependency on public funding (paragraphs 1.6 to 1.9).

We found:

- The 2,591 Academy Trusts are companies limited by guarantee, under the Companies Act 2006. They receive the majority of their funds from central government. The government does not own these companies. They are operationally independent with their own boards of directors and accounting officers, and operate on a not for profit basis. By 31 March 2015, the number of Academy Trusts had increased to 2,634 (Figure 9 on page 23).

- The 218 parent companies and their 229 subsidiaries are distributed widely across all 17 central government departments. In total 39% of the companies identified are listed in at least one of the ONS, Cabinet Office and Treasury sources (84 out of 218, leaving 134 companies not included). The majority (138 out of 218) are private companies limited by shares under the Companies Act. The number of subsidiaries is likely to be an underestimate as we only identified the first line of subsidiaries (paragraphs 2.17 to 2.19).

8 Annual reports and accounts published by each of the 17 departments do not always provide a full list of companies. In total, 139 companies are identified across the 17 departmental annual report and accounts, leaving one third of the companies (79 out of 218) undisclosed. Seven of the 17 departments identify all of the companies that we have included in the departmental mapping. Figure 2 overleaf compares the total number of companies disclosed in the annual report to the full departmental mapping of companies in government (Part Five).
Figure 2
Disclosure of companies in departmental annual reports 2013-14

Not disclosed (%) 94 80 77 67 53 27 19 13 8 7 0 0 0 0 0 0 0 0 36
Disclosed (%) 6 20 23 33 47 73 81 88 92 93 100 100 100 100 100 100 100 64
Total number 16 15 35 3 17 15 31 8 25 15 21 5 4 3 3 1 1 218

Notes
1. The decision whether or not to disclose a company is generally based on the department’s assessment of the materiality of the company relative to the department. (See paragraphs 2.11 and 2.14).
2. Defra = Department for Environment, Food & Rural Affairs; DCLG = Department for Communities and Local Government; DCMS = Department for Culture, Media & Sport; 
   HO = Home Office; MoD = Ministry of Defence; HMT = HM Treasury; DfT = Department for Transport; DoH = Department of Health; BS = Department for Business, Innovation & Skills; 
   DECC = Department of Energy & Climate Change; MoJ = Ministry of Justice; CO = Cabinet Office; DWP = Department for Work & Pensions; DfE = Department for Education; 
   FCO = Foreign & Commonwealth Office; DFID = Department for International Development; HMRC = HM Revenue & Customs

Source: Departmental annual report and accounts 2013-14 financial year
There is no set approvals process for forming a company in government. There are clear approvals processes for public bodies and alternative models such as public service mutuals. There is no central guidance on when a company is the most appropriate form of new body (paragraphs 3.2 to 3.4 and Figures 10 and 11).

There has been an increase in the number of companies in government at the same time as a reduction in the number of public bodies. Since 2010 and 31 March 2014, the number of public bodies has been reduced by 285. In the same period 11 new non-departmental public bodies (NDPBs) were created as well as 173 new organisations not classified as public bodies, of which 66 are companies (this analysis excludes the 2,591 Academy Trusts, and includes 21 Community Rehabilitation Companies which have since been sold although government retains a special share) (paragraphs 3.6 to 3.8 and Figure 12).

The current accountability system does not reflect the differences between a public body that is incorporated (as a company, Royal Charter or statutory corporation) or not incorporated. Managing Public Money applies to all central government bodies including those that are companies in government. Government corporate governance guidance, such as Corporate Governance in Central Government Departments: Code of Good Practice focuses on ministerial departments but is relevant to those arm’s-length bodies (ALBs) which are also companies in government (paragraphs 4.4 to 4.16 and Figures 13 to 15).7,8

---

Part One

Concepts

1.1 This section introduces the definitions and concepts concerning companies in government that we use throughout this report.

The types of company referred to in this report

1.2 ‘Companies in government’ is an umbrella term we have defined to cover the range of corporate forms and means of ownership and control that we observe across government.

1.3 Companies in government take various corporate forms (see Appendix Two). The most common are limited companies incorporated and registered under the Companies Act 2006. The most frequently used of that type are:

- **Private company limited by guarantee.** The liability of the owners (members) on winding up the company is limited to the (usually nominal) amount stated in the company’s articles. It is commonly used for not-for-profit companies;

- **Private company limited by shares.** The liability of its owners (the shareholders) is limited to the amount, if any, unpaid on the shares which cannot be publicly traded. Shares in government companies are typically owned by the Secretary of State and have a nominal value of £1.

1.4 Companies in government also use special corporate forms:

- **Companies incorporated by Royal Charter.** A Royal Charter is a way of incorporating a body, that is, turning it from a collection of individuals into a separate legal entity. A body incorporated by Royal Charter has all the powers of a natural person, including the power to sue and be sued in its own right. These have no shares or members and are created by Royal Charter which sets out the terms of operation.

- **Companies created by legislation.** These are also called statutory companies or corporations. They are created by bespoke legislation and have no shares or members.

---

9 Privy Council Office Information on Chartered bodies. Available at: http://privycouncil.independent.gov.uk/royal-charters/chartered-bodies/
1.5 Some companies in government are ‘Public Corporations’, a statistical classification which ONS applies. Not all companies in government are Public Corporations (paragraph 2.7 to 2.9).

Ownership and control

1.6 This report identifies companies which central government wholly or partially owned or controlled in the 2013-14 financial year. Companies wholly or partially owned are generally companies limited by shares where government owns all or some of the shares.

1.7 Government controlled companies are companies limited by shares or guarantee where government is a member and/or where it exerts control by:

- being able to appoint, approve or remove directors;
- providing funding, with rights of control over how that funding is spent;
- owning a share conferring special rights;
- or being able to set or constrain corporate policy.

Definitions of a company and a public body

1.8 A company is a voluntary association of individuals incorporated by registration, usually created to conduct business, to become a separate legal entity from its owners. It has the full legal powers of an individual, for example to enter into contracts, raise funds, incur liabilities and employ staff. It is accountable to its owners but their liability for what the company does is limited. Companies in government which are incorporated under the Companies Act 2006 (Companies Act) have equivalent legal status whether they are in the public sector or in the private sector.

1.9 A public body (also known as an arm’s-length body (ALB)) is sponsored by a central government department and operates within the terms of a framework document agreed with the department. A public body is accountable through the accounting officer (AO) to the Secretary of State for the department and then to Parliament. Public bodies are categorised or classified according to their function and characteristics rather than legal form. Public bodies can be incorporated as companies and if incorporated under the Companies Act have equivalent legal status to companies in the private sector. Figure 3 on page 14 sets out the categories of public bodies in central government.

10 We used a test of control based on the test of control for merger control purposes (see Enterprise Act 2002 s. 26). This test allows for actual control based on majority share ownership, and control of policy or ability to materially influence corporate policy with a minority or no share ownership.

11 Companies that depend on public money to operate could present a risk to the taxpayer if the company fails as the taxpayer is likely to have to bear the cost of replacing the service they offer.

12 These companies are generally regarded as being in the private sector.
Part Two

Measurement

2.1 This section explains the scope of the five public sources of information we used to identify companies in government and compares the results of each. Each source is designed for a specific purpose and does not seek explicitly to identify or provide information on whether a body has company status. It also summarises a sixth source—a full departmental mapping—which expands on all of the other sources.

Summary of sources

2.2 The five public sources are:

- Central sources:
  - Public Bodies Data Directory, which Cabinet Office prepares;
  - Public Sector Classification Guide, which the Office for National Statistics maintains;
  - Whole of Government Accounts, which HM Treasury prepares;
- Companies House:¹³
  - The official register of UK companies incorporated and registered under the Companies Act.
- Departmental sources:
  - Annual reports and accounts prepared by 17 central government departments.

¹³ We could not use the register to identify companies in government because there was no common search term we could use. Once we identified companies we used the register to verify their form.
2.3 We used these sources, and our own primary research, to produce our own map of companies in government by department (Part Five). We identified 3,038 companies in government: 218 parent companies, 2,591 Academy Trusts and 229 first line subsidiaries (see Figure 7 on page 19). This analysis seeks to assess companies in government as at 31 March 2014. The landscape is subject to change and significant changes after this date are noted later in this part (paragraph 2.20).

2.4 A comparison between these sources showed:

- 12% of companies in government appear in all three central sources (27/218);
- 13% of companies in government appear in just one of these three central sources (29/218);
- 62% of companies in government are not included in any of these three central sources (134/218);
- 38% of companies in government appear in at least one of the three central sources (84/218); and
- 97% of companies in government are included in the Companies House register (211/218).

The number of companies recorded in each information source

Source 1: Public Bodies Data Directory

2.5 The Public Bodies Data Directory (PBD) lists certain public bodies (non-departmental public bodies (NDPBs), Executive Agencies (EAs) and non-ministerial departments (NMDs) operating at arm’s length from their sponsoring departments. It does not seek to provide a comprehensive listing of all public bodies. Cabinet Office produces it to improve transparency and accountability of public bodies and to provide an annual update on public body reform.  

2.6 The PBD lists public bodies by department and administrative category but does not separately identify which of these are companies. It lists the name of the entity and gives details about it. From this information we were able to identify which of these public bodies were also companies in government. Some public bodies are also companies if they have been incorporated under the Companies Act or by other means (see paragraph 1.4). According to the PBD there are 28 companies in government of the categories of public bodies that it covers: all 28 are categorised as an NDPB and one is classified as both an NDPB and Public Corporation (Figure 3).

</tbody>
</table>

**Notes**

1 Companies in government includes Companies Act 2006 companies, Royal Charter companies, statutory corporations.

2 Non-departmental public body (NDPB) includes executive, advisory and tribunal NDPBs.

3 Public Corporation is a statistical classification, and not an administrative category.

Source 2: Public Sector Classification Guide

2.7 The ONS classifies organisations according to categories set out in the 2010 European System of Accounts.\(^{15}\) The Public Sector Classification Guide lists those bodies the ONS has classified as public sector bodies for national accounts purposes.\(^{16}\)

2.8 The ONS classifications are separate from the categories in the PBD and the process does not separately identify companies in government. The classification process at 31 March 2014 is outlined in Figure 4 overleaf.

2.9 We checked the ONS Public Sector Classification Index and identified 69 companies in government (Figure 5 on page 17).

Source 3: Whole of Government Accounts

2.10 The Whole of Government Accounts (WGA) are the consolidated financial statements for the whole of the UK public sector (central and local). It shows what the UK government spends and receives and what it owns and owes. It is produced annually by HM Treasury and audited by the Comptroller and Auditor General (C&AG). The WGA uses the statistical classifications produced by the ONS but does not distinguish between financial and non-financial public corporations.

2.11 The WGA lists the entities which are consolidated to form the accounts in Annex 1 of the WGA.\(^{17}\) The entities to be included in the WGA are notified annually in the Whole of Government Accounts (Designation of Bodies) Order\(^{18}\) which HM Treasury prepares. We reviewed the WGA for the 2013-14 financial year and identified 69 companies in government (Figure 6 on page 17). The departmental accounting boundary determines which entities are consolidated in the WGA and subsequently disclosed in the accounts. The departmental boundary is similar to the concept of a group under generally accepted accounting practice, but is based on the control criteria used by the ONS to classify the relevant sponsored bodies.\(^{19}\) Any body classified as a Public Corporation by the Office for National Statistics (which includes trading funds) is outside the departmental accounting boundary.\(^{20}\)

Public non-financial corporation

Central government

Local government

Note

1 Public financial corporations are subdivided into Central Bank, Financial Auxiliaries, Insurance Corporations & Pension Funds, Monetary financial Institutions and other financial intermediaries.

Where a department has an investment in another public sector entity that does not meet the criteria for consolidation, it should be reported following the requirements of IAS 39 (recognition and measurement of financial instruments). This includes all interests in bodies classified as public corporations by the ONS, which are within the scope of Managing Public Money principles.21

Source 4: Companies House

Companies House maintains the official government register of UK companies incorporated and registered under the Companies Act.22 Of the 218 companies in government that the NAO identified, 211 are on the register. The remainder are not incorporated and registered under the Companies Act 2006.

---

Source 5: Departments’ Annual Reports and Accounts

2.14 Departmental annual reports and accounts do not always list all companies owned or controlled by the department. The Government Financial Reporting Manual (FReM), the technical accounting guide to the preparation of financial statements, requires departments to list all entities within the departmental boundary. This boundary does not necessarily include all the companies in government we have identified. Departments disclose investments including interests in companies in accordance with accounting standards but are not required to disclose the extent of the interest in a company investment.

2.15 We checked the 2013-14 Annual Report and Accounts to see how many of the companies in government we have identified have been disclosed. Seven out of 17 departments disclosed all of the companies in government we had identified somewhere in their annual report, although not necessarily in one place or with additional information on the nature of the company or the relationship to the department. In total 79 out of 218 companies were not set out in the annual report for the relevant department. Figure 2 on page 8 sets out our findings by department.

Source 6: Departmental mapping

2.16 The NAO used the sources listed above and individual company accounts to identify 218 companies in government of which 41 are dormant and their 229 first line subsidiaries. These are included in the departmental maps of companies in government (Part Five).

2.17 We identified a total of 3,038 companies wholly or partially owned or controlled by government in the 2013-14 financial year. This included 2,591 Academy Trusts which were not included in the departmental maps.

2.18 The results of the NAO’s identification are summarised in Figure 7, which shows the number of companies we have identified for each department and their legal form.

Increase in the number of companies since 2010

2.19 In the period 2010–2014, 66 new companies were formed. Of these, 21 were Community Rehabilitation Companies, nine DFT companies have been dormant since creation and ten have been identified as financial institutions.23 In addition, 2591 Academy Trusts were created using the form of a company limited by guarantee.24 Figure 8 on pages 20 and 21 shows the number of new companies in each department. Part Five contains further details of each new company.

---

24 Academy Trusts operate under the Academies Act 2010. Section 12 of this Act specifies that Academy Trusts are companies limited by guarantee and are charities. An Academy Trust may operate one Academy school, or a number of schools, when they are known as a Multi-Academy Trust.

Developments since 31 March 2014

2.20 The report was prepared using information at 31 March 2014. A summary of key changes to companies is set out in Figure 9.

Figure 9
Summary of developments since 31 March 2014

<table>
<thead>
<tr>
<th>Department</th>
<th>Recent developments</th>
</tr>
</thead>
<tbody>
<tr>
<td>Department for Education (DfE)</td>
<td>The number of Academy Trusts increased to 2,634.</td>
</tr>
<tr>
<td>Ministry of Justice (MoJ)</td>
<td>Despite the sale of the 21 Community Rehabilitation Companies (CRCs), they remain under government control with the Secretary of State for Justice holding one special share in each. The ONS has reclassified the CRCs to the private sector effective 1 February 2015. The proceeds from this disposal process were £365,000, the value of net assets in each of the CRCs as at that date.</td>
</tr>
<tr>
<td>Department for Business, Innovation &amp; Skills (BIS)</td>
<td>Ordnance Survey was incorporated on 8 July 2014 with shares 100% owned by the Secretary of State for BIS. It was then vested and a new company began operations on 1 April 2015.</td>
</tr>
<tr>
<td>Department of Health (DoH)</td>
<td>Dr Foster Intelligence Ltd was sold as of 25 March 2015.</td>
</tr>
<tr>
<td>Home Office</td>
<td>College of Policing Ltd ownership has been relinquished as of 22 April 2015.</td>
</tr>
<tr>
<td>Department of Energy &amp; Climate Change (DECC)</td>
<td>NDA Archives Ltd was incorporated on 1 July 2014. INS Rokkasho KK(Japan) Ltd was liquidated on 22 January 2015.</td>
</tr>
<tr>
<td>Ministry of Defence (MoD)</td>
<td>A special share has been acquired in CLH Pipeline System (CLH-PS) Ltd as of 30 April 2015. Admiralty Hydrographic Asia Pacific Pte Ltd was dissolved on 14 July 2015.</td>
</tr>
<tr>
<td>Department for Transport (DfT)</td>
<td>The government sold its shares in Eurostar for £757.1 million. Network Rail has been included in the ONS public sector classification as a result of changes to the European System of Accounts. The change came into effect on 1 September 2014. The Highways Agency, an executive agency, became Highways England, a company, in April 2015.</td>
</tr>
<tr>
<td>Department for Work &amp; Pensions (DWP)</td>
<td>The government sold the majority of Remploy’s operations and the brand as a subsidiary company, also called Remploy. A private company now owns the majority and an employee trust has a minority holding. DWP manages some residual liabilities via the original company, now renamed Disabled People’s Employment Corporation (GB) Ltd.</td>
</tr>
</tbody>
</table>

Notes
2 Proceeds from the sale of the Community Rehabilitation Companies is taken from the Ministry of Justice’s Annual Report and Accounts 2014-15.
3 Proceeds from the sale of Eurostar is taken from HM Treasury’s Annual Report and Accounts 2014-15.

Part Three

Formation

3.1 This section describes the process of creating arm’s-length public bodies (ALBs) and the circumstances in which they may be incorporated as companies, Royal Charters or statutory corporations. It also describes the public bodies reform programme.

Creation of a new public body

3.2 We reviewed the process for creating a new public body, and how this related to companies in government. Currently, “the government’s presumption is that if a public function is needed then it should be undertaken by a body that is democratically accountable at either national or local level.”

3.3 Creation of a new public body involves:

• the department concerned;
• the ONS, to assess the statistical classification of the new body once it has been set up;\(^{26}\)
• the departmental and HM Treasury Spending Team if doing something ‘novel or contentious’, or if significant expenditure is involved;\(^{27}\) and
• the Cabinet Office Public Bodies Reform Group (PBRG) on the administrative category.

---

\(^{25}\) As seen on the Cabinet Office’s Public Bodies Reform Guidance. Available at: www.gov.uk/guidance/public-bodies-reform. This refers to the 2010 Public Bodies Reform Programme and the Cabinet Office are in the process of updating their ALB reform strategy.

\(^{26}\) The ONS may provide provisional classification advice on how a proposed body would be classified if set up as described to ONS but does not proactively seek this involvement and would provide the advice only if it is sought by a ‘policy proposal’ being brought forward. The ONS will only answer questions of the form ‘we plan to do this, how will it be classified?’: The ONS does not advise on how something should be structured to achieve a certain classification.

3.4 In order to create a new non-departmental public body (NDPB), one or more of the following three tests must be satisfied:

- Does it perform a technical function that could not be delivered in a department?
- Does its activities need to be, and be seen to be, delivered with absolute political impartiality?
- Does it need to act independently of ministers to establish facts and/or figures?

3.5 The Commercial Models team within the Cabinet Office advises on alternative ways of delivering services rather than through either public bodies or existing private sector suppliers; this includes creating new private sector suppliers such as public service mutuals and public-private joint ventures. These alternative models are not subject to the approvals process for public bodies (Figure 10) unless they are in particular category of public body.

### Figure 10
Approval process for public bodies

<table>
<thead>
<tr>
<th>Category</th>
<th>Approval process</th>
</tr>
</thead>
<tbody>
<tr>
<td>Non-ministerial department</td>
<td>Cabinet Office, HM Treasury ministers and then the Prime Minister. Needs exceptional business case and generally established by statute.</td>
</tr>
<tr>
<td>Executive Agency</td>
<td>Cabinet Office and HM Treasury ministers. Requires value for money (VfM) case supported by fully-costed business case.</td>
</tr>
<tr>
<td>Executive non-departmental public body (NDPB)</td>
<td>Cabinet Office and HM Treasury ministers. Needs fully-costed business case establishing need for the body and the function and must satisfy one of the three tests. Established as a last resort.</td>
</tr>
<tr>
<td>Advisory NDPB</td>
<td>Same as Executive NDPB. Cabinet Office ministers. Established as last resort.</td>
</tr>
<tr>
<td>Tribunal NDPB</td>
<td>No longer used as new appeal rights are administered by the First Tier Tribunal.</td>
</tr>
</tbody>
</table>

**Note**

1 All Executive Agency Trading Funds are Public Corporations but not all Public Corporations are Trading Funds. Trading Funds are anomalous in being outside Central Government for national accounts purposes but in general being legally part of their sponsoring department.

---

Companies in government

Part Three

25

3.6 Cabinet Office told us depending on the purpose for which government forms a company, various approval processes may apply. When government incorporates a company, it is to do one or more of the following things:

- create a new NDPB (which requires Cabinet Office Public Bodies Reform Team approval);
- create any new organisation, including (but not limited to) a spin-off from central government, joint venture, public corporation, charity, public service mutual, or social enterprise (which requires Cabinet Office Commercial Models Team approval);
- spend a significant sum of money (which requires HM Treasury approval or Departmental Finance Team approval, depending on the level of spend versus delegated limits); or
- do something that sets a precedent, is novel, contentious or could cause repercussions elsewhere in the public sector (which requires HM Treasury approval).

3.7 Approval by Commercial Models and HM Treasury (or the Departmental Finance team if the anticipated level of spend is below the delegated limit and it is deemed not to be novel or contentious) is based on a business case.

3.8 As set out in Part Two, we found only 28 companies in government which had a public body categorisation, and 190 out of 218 companies have no public body category.

3.9 Figure 11 on pages 26 and 27 sets out the pathways for a new public body to be incorporated as a separate legal entity.

Public bodies reform policy

3.10 The public bodies reform policy aims to rationalise the number of public bodies operating at arm's length from government, increase the accountability of those remaining, explore new innovative models and, through triennial reviews, ensure remaining public bodies continue to be the best mode of delivery.

3.11 Between 2010 and 2014, the Cabinet Office oversaw a reduction in the number of public bodies of 285. During the same period 173 new bodies were set up: 66 companies, 96 public service mutuals and 11 NDPBs, (Figure 12 on page 28).

3.12 The triennial reviews of NDPBs involves “questioning whether they should remain as an NDPB, close or be reformed”, and “making sure the highest standards of governance are upheld”. However these reviews are only carried out on those organisations with public body categorisations. There is no similar programme to review functions delivered by bodies without these categorisations.

---

30 This figure excludes the Academy Trusts.
31 Between May 2010 and June 2014, the government established and classified 12 new NDPBs which were not previously in existence in another form, including seven independent monitoring boards (which must be set up whenever a new prison or immigration holding centre is established, while 19 during this time have closed or merged).

Companies Act 2006
Company Limited by Guarantee
For example, Start Up Loans Company

Companies Act 2006
Company Limited by Shares
For example, Student Loans Company
### Notes

1. The Cabinet Office told us it believes this graph is misleading because it aggregates figures for dissimilar bodies. It compares some types of public body and some types of contracted service, some of which are provided at national level and some locally. As such the Cabinet Office believes that the graph does not make proper distinction between different types of organisations and as a consequence gives a distorted picture of changes to the service provision landscape.

2. According to the Cabinet Office the eight government-owned companies or public corporations that were merged or abolished were not NDPBs. The organisations concerned are: Audit Commission for Local Authorities and the National Health Service in England, BRB (Residuary) Ltd, British Nuclear Fuels Limited, British Shipbuilders, British Waterways, Forensic Science Service, General Teaching Council for England, Horserace Totalisator Board.

Part Four

Governance and accountability

4.1 This section describes some of the key relationships between departments and companies; how principles of public accountability are combined with corporate governance arrangements; and compares the approach to assurance of public bodies to assurance of companies in government. We looked at the existing arrangements, not how each department implemented those.

Description of the relationship between departments and companies

4.2 The government’s corporate portfolio is widely distributed across government. All 17 central departments have interests in companies, which may take various forms:

- **Direct relationship** between a department and company, as a subsidiary or investment. For example, the Department for Transport (DfT) owns Directly Operated Railways Ltd; the Department of Health (DoH) owns NHS Property Services Limited.

- **Indirect relationship**, through a specialist asset management company. For example, UK Financial Investments Limited (UKFI) was established in 2008 to manage the government’s shareholdings in Royal Bank of Scotland (RBS), Lloyds Banking Group and UK Asset Resolution Limited (UKAR). UKFI operates under a framework document and is a signatory to the FRC Stewardship code. In addition, there is an investment mandate which states:
  - In relation to RBS and Lloyds it will follow “best institutional shareholder practice” including the Institutional Shareholders’ Committee’s statement of principles, and the Walker review;
  - In relation to wholly-owned companies, UKFI will engage with UKAR in a manner “similar to that in which a financial sponsor would engage with a wholly-owned portfolio company”.

- **Joint relationships**. The ownership and governance of some companies in government is shared between departments. For example, the Secretary of State for Business, Innovation & Skills (BIS), the Minister for Employment and Learning, Northern Ireland, the Minister for Education and Skills, Welsh Government and the Scottish Ministers jointly own the Student Loans Company Limited, and the Department of Energy and Climate Change (DECC) owns the Low Carbon Contracts Company, but both DECC and BIS provide board members.
4.3 The relationship between a company and a department can be complex and multifaceted. For example, a department can be a shareholder (i.e., provider of equity capital), lender (i.e., debt capital), or a guarantor. It may be a major, or the only customer (providing a source of revenue), and it may be a supplier of goods, services, or personnel (for which it may be remunerated). It may exercise control or influence directly by appointing directors, or indirectly, for example through a specialist unit such as the Shareholder Executive.33

Role of the accounting officer

4.4 The accounting officer (AO) is the individual with personal responsibility for public money in each public body, including companies in government. Where a department has an interest in a company there may be more than one involved. For example, the DIT’s ownership of Directly Operated Railways Ltd involves two AOs – one for the department, and one for the company. HM Treasury’s ownership of RBS involves three AOs – the department, RBS, and UKFI. The Department for Education’s Academy Trusts involves three AOs – the department, the Education Funding Agency (who pass agreed grants to the Academy Trust) and the individual Academy Trust, which might operate one or many academies.

4.5 The responsibilities of an AO are not the same as the responsibilities of a company director, as shown in Figure 13. The main difference is that an AO has personal responsibilities and a company director has collective and personal responsibilities enforceable under law.

4.6 Company directors (the board) act collectively within the powers conferred by the company constitution (Articles of Association) and the owners to manage the company on behalf of the owners. The board is collectively responsible to the owners for ensuring the company complies with all relevant legislation and directors fulfil their duties.

4.7 Individual company directors (including directors of companies in government) owe duties to the company which are set out in Part 10 of the Companies Act and are enforceable by owners on behalf of the company.34 A director is also required to comply with a wide range of sectoral and other legislation, for example the Insolvency Act 1986, the Health and Safety at Work Act 1974 and the Corporate Manslaughter and Corporate Homicide Act 2007. Although the responsibilities of the AO and company director might overlap, there is an assumption, but no specific requirement, that the AO of a company in government is also a director.35 Managing Public Money recognises that there are ‘sensitivities’ about the role of an AO in a company, and that conflicts may arise but does not explain how to resolve them.36

---

33 The Shareholder Executive (ShEx) is a unit within the Department for Business, Innovation & Skills established in 2003 to centralise shareholding expertise within government.
34 Companies Act 2006 Part 10, Chapter 2.
35 Managing Public Money 3.3.2 states: “The accounting officer of a corporate arm’s length body should arrange for a board member to sign the accounts as well as signing them himself or herself, if (unusually) he or she is not a member of the board”.
36 Managing Public Money 3.8.5 states: “There are sensitivities about the role of the accounting officer in an arm’s length body (ALB) which is governed by an independent board, e.g. a charity or company. The ALB’s accounting officer, who will normally be a member of the board, must take care that his or her personal legal responsibilities do not conflict with his or her duties as a board member. In particular, the accounting officer should vote against any proposal which appears to cause such a conflict; it is not sufficient to abstain.”

**Notes**

4. For companies in government arrangements are in practice a combination of those in the table, generally with an AO appointed and a framework document ensuring appropriate arrangements are in place.

Source: HM Treasury, Managing Public Money; Companies Act 2006; UK Code of Corporate Governance; Model Articles
Sponsorship

4.8 Sponsorship refers to the link between departments and their ALBs. Departments are expected to play an active role in the governance, financial management, risk management and performance monitoring of ALBs and are responsible for managing the relationship with an ALB on behalf of the minister and the AO.37

4.9 Current sponsorship guidance does not specifically address the relationship between departmental sponsors and companies in government nor other specific forms of arm’s-length bodies.

Review of corporate governance guidance

4.10 We reviewed various documents that provide guidance about governance in the public sector and other corporate governance guidance that applies in the private sector. We also set out the specific arrangements in a small sample of companies in government (Appendix Three).

4.11 Managing Public Money states each public sector organisation should establish governance arrangements that combine efficient decision-making with accountability and transparency.38 There is no specific guidance for governance of companies in government but a range of governance codes and principles are relevant (Figure 15). These include a few specific references to ‘companies’:

- The primary public sector governance resource, Corporate Governance in Central Government Departments: Code of Good Practice (the Code of Good Practice)39 states that when an arm’s-length body is a company, one lever of control which the department’s AO may use to influence the AO of the arm’s-length body is the shareholder vote. However this should only be used “in extremis”.40

- The guidance Principles of Good Corporate Governance in Executive Non Departmental Bodies (the NDPB Code) states for NDPBs established as companies, or which have charitable status, the public body must also be fully compliant with relevant statutory and administrative requirements.41

---

38 Managing Public Money 4.1.1.
40 Corporate governance in central government departments, Code of good practice 2011 – Guidance Note. Paragraph 5.6 states: “A departmental AO should be prepared to use the mechanisms for ensuring AOs in the department’s ALBs fulfil their AO responsibilities. In extremis, these might include: exercising shareholder or guarantor control if the ALB is a company; withdrawal of the delegated AO’s responsibilities in the ALB. Source available at: www.gov.uk/government/uploads/system/uploads/attachment_data/file/220648/corporate_governance_good_practice_guidance_july2011.pdf
41 Principles Of Good Corporate Governance In Executive NDPBs.
4.12 Governance arrangements for companies in government are complex, based on many difference codes (Figure 14). Framework documents\(^{42}\) between the department and the company may set out additional requirements such as compliance with elements of the private sector UK Code of Corporate Governance (the UK Code)\(^{43}\) which apply to smaller unlisted companies. The Civil Service Code\(^{44}\) sets out the standards of behaviour expected of civil servants. This also applies to civil servants acting as directors of companies in government but not to other directors or company employees.

\(^{42}\) A framework document sets out the arrangements to monitor the performance of an arm’s-length body (Managing Public Money Annex 7.2).

\(^{44}\) [www.civilservice.gov.uk/about/values](http://www.civilservice.gov.uk/about/values)
4.13 The World Bank\textsuperscript{45} and Organisation for Economic Cooperation and Development (OECD)\textsuperscript{46} have set out best practice governance principles for government companies. These are also relevant as they are internationally-agreed standards on how governments should exercise ownership of state-owned-enterprises.

4.14 Managing Public Money\textsuperscript{47} provides a number of suggestions concerning the relationship between a shareholder department and a Public Corporation,\textsuperscript{48} providing guidance for some but not all companies in government (Figure 15).

**Figure 15**
Outline terms for relationship with a Public Corporation

“Sponsor departments should define any contractual relationship with a corporate in a framework document adapted to suit the corporate context while delivering public sector disciplines. The financial performance expected should give the shareholder department a fair return on the public funds invested in the business.”

Outline terms:

- the shareholder’s strategic vision for the business, including the rationale for public ownership and the public sector remit of the business;
- the capital structure of the business and the agreed dividend regime, with suitable incentives for business performance;
- the business objectives the enterprise is expected to meet, balancing policy, customer, shareholder and any regulatory interests;
- the department’s rights and duties as shareholder, including: governance of the business; procedure for appointments (and disappointments); financial and performance monitoring; any necessary approvals processes; the circumstances of, and rights upon, intervention; and
- details of any other relationships with any other parts of government.

\textsuperscript{47} Managing Public Money paragraph 7.7.2.

\textsuperscript{48} A public corporation is a statistical classification. A public corporation may take the legal form of a company.
Central Oversight

4.15 There are two bodies which manage the government’s interests in some of its companies: the Shareholder Executive (ShEx) and UK Financial Investments Limited (UKFI) but management of the government’s corporate portfolio is conducted mainly at departmental level.

4.16 Managing Public Money promotes the use of ShEx. A Committee of Public Accounts report in 2007 recommended that “there should be a presumption that government businesses come within the Executive’s portfolio”. The Shareholder Executive’s objective is to be an effective shareholder of businesses owned or part-owned by the government and to manage government’s interventions in the private sector in order to secure best value for the taxpayer. It focuses its resources on the those government businesses where it can have most impact, in general by acting as a shareholder of those arm’s-length bodies that are structured to allow a meaningful shareholder function and other assets facing complex transformations. Our analysis has found that at of the 20 businesses ShEx was responsible for in 2013-14, 14 were companies in government. The government announced in May 2015 that ShEx would merge with UKFI into a new company, UK Government Investments Limited.

Public sector assurance arrangements

4.17 HM Treasury is responsible for appointing the auditor of public bodies including companies in government. Figure 16 overleaf compares responsibility for appointing the auditors across a range of different organisations.

4.18 The Comptroller and Auditor General (C&AG) may also carry out value-for-money (VfM) audits of departments, authorities or other bodies where C&AG is the statutory auditor or auditor by agreement, provided that the ability to do so is included in the agreement expressly or by implication. Section 7 of the National Audit Act 1983 gives the C&AG a statutory right of examination into the economy, efficiency and effectiveness VfM with which a body he has reasonable cause to believe has in any of its financial years received more than half its income from public funds has used those resources and has to consult with the body and HM Treasury whether this condition has been met. The C&AG has the same right in respect of any authority or body appointed, or whose members are required to be appointed, by or on behalf of the Crown except specific exemptions.

49 The Shareholder Executive is a unit within the Department for Business, Innovation & Skills established in 2003 to centralise shareholding expertise within government, to bring a specific focus to shareholder issues and to improve government’s performance as the owner of businesses. UK Financial Investments Ltd (UKFI) was established in 2008 to manage the government’s shareholding in Royal Bank of Scotland (RBS) Lloyds Banking Group (Lloyds) and UK Asset Resolution Limited (UKAR) which integrates the activities of Northern Rock (Asset Management) plc and Bradford & Bingley plc. ShEx and UKFI are explored in more detail in our report Financial Institutions in Government.

50 Managing Public Money paragraph 7.7.1.

53 Section 6 of the National Audit Act 1983.

54 These specific exemptions are set out in Schedule 4 of the National Audit Act 1983.

### Notes
1. Government Resources and Accounts Act, 2010: HM Treasury (HMT) appoints the statutory auditor when it appears to HMT that an organisation is substantially funded by public money.
2. Companies Act 2006. A Companies Act company must have its accounts audited (CA 2006 Part 16 section 475).
3. The Academy Trusts each have an AO who reports to the Department for Education’s Principal AO (PAO) through the Education Funding Agency (EFA). The PAO produces the annual Accountability Statement. EFA translates requirements set out by the Charity Commission in its Statement of Recommended Practice (SORP) into a form applicable to academy trusts. The Accounts Direction outlines the requirements for each academy trust to have these accounts audited annually by independent registered auditors, produce a statement of regularity, propriety and compliance and obtain a regularity assurance report on this statement from the auditor. See [www.gov.uk/guidance/academies-accounts-direction](http://www.gov.uk/guidance/academies-accounts-direction)
4. The Local Audit and Accountability Act 2014: National Audit Office set the framework for VfM. PSAA Limited is responsible for the appointment of auditors for local government, NHS bodies, and police, fire, and rescue services.
5. The C&AG is the auditor of accounts of bodies which HM Treasury decides exercise functions of a public nature or are entirely or substantially funded from public funds (Government Resources and Accounts Act 2000, section 11). HM Treasury may by statutory order make C&AG auditor of a body which exercises functions of a public nature or is entirely or substantially funded from public money and have access to documents and if the body is a Companies Act company the order does not need to be laid before Parliament. (Government Resources and Accounts Act 2000 section 25). Failing an order from HM Treasury, the company itself must appoint an auditor. The C&AG is eligible to be appointed as a statutory auditor for a Companies Act company (Companies Act 2006 Part 42 Chapter 3 section 1226).

**Note**

1 NEST is a statutory corporation but its funding is dependent on DWP, and from the NEST annual report meets two of the ONS tests of control, namely: provision of funding accompanied by rights of control over how that funding is spent; and right to demand certain reports or information. DWP has no control or any responsibility over the scheme assets or performance of/return on the assets under management.

Appendix Two

Description of company types
**Figure 19**

Description of company types

<table>
<thead>
<tr>
<th>Type</th>
<th>Characteristics</th>
<th>Formation</th>
</tr>
</thead>
<tbody>
<tr>
<td>Private limited by guarantee</td>
<td>Has members not shareholders, separate legal entity from members, liability limited to nominal amount, usually operated on a not for profit, can raise capital through borrowing.</td>
<td>Incorporated under the Companies Act 2006 and registered at Companies House.</td>
</tr>
<tr>
<td>Private limited by shares</td>
<td>Owned by shareholders, separate legal entity, liability limited to amount unpaid on shares, operated on a for profit basis, cannot raise funds by offering shares to the public.</td>
<td>Incorporated under the Companies Act 2006 and registered at Companies House.</td>
</tr>
<tr>
<td>Public limited by shares</td>
<td>Has features of private limited by shares but name ends with words ‘public limited company’ or ‘PLC’ and can raise funds by offering shares to the public.</td>
<td>Incorporated under the Companies Act 2006 and registered at Companies House.</td>
</tr>
<tr>
<td>Unlimited</td>
<td>Has all the features of a private company limited by shares; liability of members is unlimited.</td>
<td></td>
</tr>
<tr>
<td>Community Interest Company</td>
<td>A limited company, created for conducting a business or other activity for community benefit. Assets and profits must be permanently retained within the CIC and used solely for community benefit, or transferred to another organisation which itself has an asset lock, such as a charity, or another CIC.</td>
<td>Companies (Audit, Investigations and Community Enterprise) Act 2005. Formation and registration is similar to any limited company. Registered at Companies House – Registrar of Community Interest Companies.</td>
</tr>
<tr>
<td>Royal Charter</td>
<td>Created by Royal Charter which sets out the terms of operation.</td>
<td>Recommendation of the Privy Council.</td>
</tr>
<tr>
<td>Statutory</td>
<td>Entities incorporated pursuant to legislation other than Companies Act 2006.</td>
<td>Bespoke legislation.</td>
</tr>
<tr>
<td>Trading Fund</td>
<td>Executive Agency. Not a separate legal entity and remains part of the department. Engages in commercial operations and finances itself from sales of goods or services. HM Treasury appoints the Accounting Officer.</td>
<td>Statutory Order under Government Trading Funds Act 1973 with Treasury concurrence.</td>
</tr>
<tr>
<td>Registered Societies</td>
<td>Societies registered under the Co-operative and Community Benefit Societies Act 2014. This includes co-operative societies, community benefit societies and societies previously known as ‘industrial and provident societies’.</td>
<td>Registration with FCA pursuant to Co-operative and Community Benefit Societies Act 2014.</td>
</tr>
<tr>
<td>Industrial and Provident Society</td>
<td>An industrial and provident society (IPS) is an organisation set up to carry out a trade or business for community benefit. It is incorporated, which means that it has gone through the registration process that converts a new or existing business into a corporate body, making it a legal entity in its own right. IPS’s are regulated by the Financial Conduct Authority.</td>
<td>See Registered Societies.</td>
</tr>
